SWAP

Ahmet Oğuz Ergin

Why I swap?

In real life scenarios, cloud providers, provide limited CPU and RAM on vm. But they provide enough space (volume) and we can use that volume to swap memory.

Swap With New Block Device

Installing New Block Device on VM

1 Block Device Installation

2 Block Device Installation

3 Block Device Installation

Partition Disk

Run **Isbk** command to display current block devices. /dev/sdb will be added.

```
lsblk
fdisk /dev/sdb
n
p
1
w
lsblk
```

Format Partiton and Save as Persistent

```
swapon --show
mkswap /dev/sdb1
swapon /dev/sdb1
echo '/dev/sdb1 none swap sw 0 0' | tee -a /etc/fstab
reboot
swapon --show
free -h
```

Swap Without New Block Device

First Check initial sizes, 15G

```
root@st-vm:~# df -h
Filesystem
                       Used Avail Use% Mounted on
udev
                 474M
                          0
                            474M
                                    0% /dev
tmpfs
                  97M
                                    1% /run
                      456K
                              97M

                              12G
                                   16% /
                             485M
                                    0% /dev/shm
tmpfs
                 485M
                          0
tmpfs
                 5.0M
                          0
                             5.0M
                                    0% /run/lock
/dev/sda15
                 124M
                        12M
                             113M
                                   10% /boot/efi
tmpfs
                          0
                                    0% /run/user/1002
                  97M
                              97M
```

```
root@st-vm:~# free -h
                total
                              used
                                           free
                                                      shared
                                                               buff/cache
                                                                             available
Mem:
                969Mi
                             716Mi
                                          160Mi
                                                       488Ki
                                                                     263Mi
                                                                                  253Mi
                   0B
                                0B
Swap:
                                              0B
```

Run commands to create swap.

```
fallocate -1 3G /swapfile
chmod 600 /swapfile
mkswap /swapfile
swapon /swapfile
```

Check size again.

```
root@st-vm:~# df -h
